Education

Savitribai Phule Pune University — **Pune, India**
Bachelor of Computer Application – GPA: 8.23/10.0 — *June 2023 – August 2026*

YCM College Karmala — **Maharashtra, India**
XII (Science), Maharashtra Board — *June 2021 – August 2023*

Experience

Software Developer Intern (Full Stack) — **September 2025 – Present**
Argan Technology Services — *On-site*

- Engineered and deployed full-stack features for HRMS platform serving 500+ users, including attendance tracking, payroll processing, leave management, CTC calculations, and employee onboarding workflows
- Optimized attendance data processing by implementing AWS S3-based file uploads, increasing Excel processing capacity from 3,000 to 15,000+ rows (5x improvement), reducing upload failures by 85%
- Enhanced application security and user experience by implementing role-based access control (RBAC) system across 5 user roles (Employee, HR, Manager, Accountant, Super Admin) with granular permission management
- Improved UI consistency and data integrity across all dashboards by standardizing form validation, reducing user input errors by 40% and improving overall user satisfaction

Projects

Social Matchmaking Platform | *MongoDB, Express.js, React.js, Node.js, Socket.IO, JWT, Tailwind CSS*

- Built full-stack MERN application with real-time messaging capabilities using Socket.IO, supporting 100+ concurrent users with secure JWT-based authentication and authorization
- Developed swipe-based matching algorithm and connection request system, enabling users to discover and connect with compatible matches through an intuitive interface
- Implemented real-time features including instant messaging, online status indicators, and push notifications to enhance user engagement and platform interactivity

YouTube Clone | *React.js, JavaScript ES6+, REST API, Tailwind CSS, HTML5, CSS3*

- Developed feature-rich video streaming platform replicating YouTube's core functionality with video search, playback, metadata display, and content categorization using YouTube Data API v3
- Implemented advanced search and filtering system with autocomplete suggestions, enabling users to discover content across multiple categories with 95% search accuracy
- Designed responsive UI with playlist management, video interactions (likes, comments), and optimized video player, improving user engagement metrics by 60%

Movie Streaming Platform | *React.js, Firebase Authentication, Tailwind CSS, RESTful API*

- Created Netflix-inspired streaming platform with seamless video playback, user authentication via Firebase, and personalized content recommendations based on user preferences
- Integrated multilingual support with i18n, enabling content delivery in 5+ languages for UI, metadata, and subtitles, expanding potential user base by 200%
- Architected dynamic filtering system with genre-based categorization and search functionality, reducing content discovery time by 50%

Technical Skills

Languages: JavaScript (ES6+), C, C++, SQL, HTML5, CSS3
Frameworks & Libraries: React.js, Node.js, Express.js, Socket.IO, Tailwind CSS
Databases & Cloud: MongoDB, Firebase, AWS S3
Tools & Technologies: Git, GitHub, VS Code, Postman, MongoDB Compass, RESTful APIs, JWT Authentication, Netlify

Achievements

LeetCode Problem Solver: Solved 200+ algorithmic problems focusing on data structures, algorithms, and optimization techniques (Arrays, Strings, Dynamic Programming, Trees, Graphs)

College-Level Competition: Participated in Brain Battle competition demonstrating problem-solving and critical thinking skills (March 2024)
